

## Standard Features

- Monitors and displays one ambient and one winding temperature
- Micro-controller based
- Programmable on and off set-points
- Status lights for power, fans, alarm, and trip
- Maximum temperature memory
- Relays controlled by sensor input operating temperature
- One fan power relay
- Alarm relay for remote monitoring
- Trip relay for remote monitoring
- Local Alarm – 90 dB
- System test verifies all set-points and ambient temperature
- Instrument and fan power fuses
- Input voltage range for Cimco instruments is 85-264 VAC, 50 or 60 Hz
- Input voltage for fan power is 120 or 240 VAC, 50 or 60 Hz
